 Portfolio

PROFESSIONAL SUMMARY

A proactive AEM Developer with experience across AEM Sites, Adaptive Forms, and DAM. Skilled at building effective digital solutions, improving user experiences, and collaborating with teams to ensure efficient, scalable, and maintainable outcomes.

COURSES & CERTIFICATIONS

Adobe Certified Professional - Adobe Experience Manager Developer

Validated proficiency in development, custom component creation, OSGi services, Sling Models, and troubleshooting within AEM Sites.

Microsoft Certified Professional - GitHub Copilot

Demonstrated knowledge of AI-assisted software development, advanced prompt engineering, and optimizing developer workflows.

Course Completion- AEM Edge Delivery Services Developer Professional

Hands-on training in high-performance edge architectures, custom block building, document-based authoring, and web vitals optimization.

Build with Gemini - Platform IT Developer

Completed a hands-on Google Cloud lab focused on securing AI agents, monitoring system performance, and preventing prompt injections.

TECHNICAL SKILLS

Adobe Ecosystem: AEM Sites | Adaptive Forms | DAM (Assets) | Edge Delivery Services (EDS) | AEM as a Cloud Service (AEMaaCS) | Asset Share Commons

AEM Development: EDS - Document Based Authoring | EDS - Universal Editor | HTL | Sling Models | Sling Servlets | OSGi Services | Client Libraries | Editable Templates | Custom Components | Content, Experience & Form Fragments | Workflows | Oak Indexing

Web Technologies: HTML | CSS | JavaScript | jQuery

Tools: Git | GitLab | Maven | Jira | Confluence

AI Tools & Automation: GitHub Copilot | Claude Code | Adobe Experience Modernization Agent (EMA) | Model Context Protocol (MCP) | Google Cloud Agent Platform

WORK EXPERIENCE

Infosys

Associate Consultant

Feb 2025 – Present
Pune, India

Role: AEM EDS Developer

Project: AEM Next-Gen Modernization & EDS Migration

Client: Adobe Inc.

Description: A website modernization project focused on migrating existing AEM and non-AEM websites to EDS to achieve maximum loading speeds and perfect lighthouse performance scores.

Key Contributions:

- Engineered functional Proof of Concepts (POCs) to demonstrate lightweight content delivery using both EDS Document-based Authoring and the EDS Universal Editor.
- Developed high-performance custom blocks using vanilla JavaScript, HTML, and CSS, optimizing Core Web Vitals to consistently hit target 100/100 Lighthouse performance scores.
- Designed prototype migration workflows leveraging Adobe Experience Modernization Agent (EMA) to transition component structures into modern Edge Delivery frameworks.
- Conducted deep-dive technical evaluations of Universal Editor capabilities, ensuring alignment with upcoming modernization roadmaps and account readiness guidelines.

Role: AEM Sites & DAM Developer

Project: eDAM

Client: T-Mobile, USA

Description:

A centralized DAM solution built on Adobe's Asset Share Commons, designed to manage and distribute digital assets across multiple client portals. The system streamlines asset storage, retrieval, and metadata management while integrating analytics and automation features.

Key Contributions:

- Developed reusable AEM Sites components and customized DAM functionalities using HTL, Sling Models, Sling Servlets, OSGi Services and Workflows.
- Implemented Adobe Analytics data layer and event tracking to enable user interaction and website traffic analysis.
- Customized and extended Asset Share Commons to support enterprise-wide digital asset management requirements.
- Automated metadata report generation using AEM Schedulers and custom Workflow processes.
- Performed bulk asset metadata updates using Manage Controlled Processes (MCP) and resolved metadata-related issues during asset migration activities.
- Developed feature enhancements, resolved production defects and optimized existing AEM components.
- Collaborated with clients and cross-functional Agile teams to analyze requirements, design technical solutions and deliver business features.

Recognition:

- Recipient of the '**Digital Marketing Professional - Adobe Solutions**' Skill tag for completing required training, certifications and exceptional work performance.

LTIMindtree

Software Engineer

Aug 2022 – Jan 2025

Pune, India

Worked as a **AEM Forms and Sites Developer**.

Project: V3 implementation of MCA website.

Client: Ministry of Corporate Affairs, Government of India.

Description:

Government of India initiative to modernize and streamline company registration and compliance processes under the Ministry of Corporate Affairs (MCA). The platform was built on Adobe Experience Manager (AEM) to deliver scalable, user-friendly digital services through AEM Sites and Adaptive Forms.

Key Contributions:

- Developed and maintained AEM Sites and Adaptive Forms to deliver business requirements using Adobe best practices.
- Built and customized Adaptive Forms using custom components, Rule Editor, GuideBridge, Pre-fill Services, and custom submit actions.
- Implemented custom validations and business rules to deliver dynamic and user-friendly form experiences.
- Developed feature enhancements and resolved production defects across AEM Sites and Forms modules.
- Resolved customer-reported production issues within SLA timelines, ensuring application stability and high service availability.
- Collaborated with clients, business stakeholders and Agile teams to analyze requirements, design technical solutions and deliver business features.
- Participated in code reviews, technical discussions and knowledge sharing to ensure high-quality deliverables.

Recognitions:

- Recipient of the '**Shooting Star – Q3FY25**' award for exceptional individual performance in deliverables and production support.
- Contributed to the team receiving the '**Star Crew Award**' by helping achieve a **90% reduction in production tickets** through proactive issue resolution and quality improvements.

EDUCATION

B.Tech in Computer Science and Engineering
MGMs College of Engineering
CGPA - 8.22

Jul 2018 – Jul 2022
Nanded, Maharashtra

INTERESTS

- Playing Cricket
- Playing Video Games
- Learning about personal finance

SOFT SKILLS

- Dynamic Teamwork
- Flexibility
- Accountability
- Interpersonal Communication
